

# Eat green. Live green. Our growing commitment.

**At CulinArt and Teachers College, we provide tasteful solutions that meet your needs while helping to preserve the needs of future generations.**

**We do this by:**

- recycling
- reducing waste
- offering china and flatware as an alternative to disposables
- using biodegradable and eco-friendly disposable products
- using eco-friendly chemicals for cleaning
- providing used coffee grinds and compost for your garden
- featuring fresh, delicious, local and organic produce
- reclaiming used cooking oil for conversion to biofuel

**We will continue to develop green dining initiatives that help support our environment.**
